

WHAT IS CLAIMED IS:

1. A touch panel holder frame comprising:
 - a first positioning enclosure attached to a display device body to surround a whole or a part of an outer periphery of a display screen;
 - a second positioning enclosure attached to a touch panel to surround a whole or a part of an outer periphery of said touch panel; and
 - a plurality of holding pawl sections provided on an inner surface of said second positioning enclosure for engaging said outer periphery of said touch panel to prevent said touch panel from coming out of said touch panel holder frame.
2. The touch panel holder frame according to Claim 1, further comprising a spacer section extending between said first and second positioning enclosures.
3. The touch panel holder frame according to Claim 2, wherein said first and second positioning enclosures and said spacer section are integrated together with one another and made of a non-cellular resin material.
4. The spacer member including an integrated frame-like body adapted to be disposed around a display screen of a display device body.
5. The spacer member according to Claim 4, wherein said integrated frame-like body is made of a non-cellular resin material.
6. A display device comprising:
 - a display device body having a display screen;
 - a touch panel having a touch detection area corresponding to said display screen;
 - a first positioning enclosure attached to a display device body to surround a whole or a part of an outer periphery of a display screen;
 - a second positioning enclosure attached to a touch panel to surround a whole or a part of an outer periphery of said touch panel; and
 - a plurality of holding pawl sections provided on an inner surface of said second positioning enclosure for engaging said outer periphery of said touch panel to prevent said touch panel from coming out of said touch panel holder frame.
7. The display device according to Claim 6, wherein a spacer section extends between said first and second positioning enclosures to define a given clearance between said display screen and said touch panel.
